PROFILE

I was born in Tehran in 1986 and lived in Tehran, Shahryar, and Isfahan for many years.

I love working in the digital world and information technology, and I believe that IOT and artificial intelligence will soon transform human life.

I started working in an electronics store to manage the IT department of a large organization. For various reasons, I have worked in almost all aspects of information technology,

I would like to work with multinational corporations in a variety of ways to reach mutual agreement and consent.
